

BOYD ANNOUNCES OVER \$2 MILLION IN STIMULUS DOLLARS FOR WAKULLA COUNTY WASTEWATER INFRASTRUCTURE

WASHINGTON, D.C. – U.S. Congressman Allen Boyd (D-North Florida) today announced that Wakulla County will receive a stimulus grant of \$713,500 and a low-interest loan of \$1,495,000 to help finance improvements to Crawfordville’s wastewater infrastructure. This funding was made available under the American Recovery and Reinvestment Act, which was signed into law with Congressman Boyd’s support.

“With these federal stimulus dollars, Crawfordville will be able to upgrade its wastewater infrastructure and address an important need in the community,” said Congressman Boyd. “This investment in our wastewater treatment facilities will help maintain the quality of our drinking water and greatly benefit the people of Wakulla County.”

This federal stimulus funding is being administered by the United States Department of Agriculture (USDA) Rural Development’s Water and Environmental Program, which provides loans and grants to better deliver safe drinking water in rural areas.
